EDUCATION

- 2021
- UNIVERSITY OF THE PHILIPPINES LOS BAÑOS
- Bachelor of Science in Computer Science

SKILLS

- Back-End Development
- Front-End Development
- Database Management and Optimization
- API Integration and Development
- Process Automation and Efficiency
- Version Control Systems
- Cloud Services
- Software Architecture
- Agile Methodologies
- DevOps Basics
- Technical Writing and Documentation
- Machine Learning and Data Science Integrations
- Data Engineering Basics
- Collaboration and Teamwork
- Client Interaction

LANGUAGES

- English (Fluent)
- Filipino (Fluent)

PROFILE

I'm a Software Engineer with 5+ years of experience building enterprise solutions across full-stack web development, AI-enabled automation, and Oracle NetSuite. I currently work on NetSuite SuiteApps, where I deliver features across modules, support release stability, and own quality activities, including end-to-end and regression testing. Previously at EY, I built automation and AI solutions using UiPath, Power Automate, OpenAI, React, Node.js, and GraphQL for global clients. My strengths are: Translating business requirements into reliable technical solutions; Building integrations across APIs, enterprise tools, and data platforms; Delivering maintainable code, clear documentation, and production-ready releases. Core technologies: SuiteScript, JavaScript/TypeScript, React, Node.js, SQL, REST/GraphQL, UiPath, Power Automate, Azure.

WORK EXPERIENCE

Oracle NetSuite

July 2025 - Present

Software Engineer

- Engineered NetSuite SuiteApp features for Supply Chain and SuiteApprovals modules.
- Built E2E automation suites using Groovy, Jest, and SSTF to optimize regression testing.
- Directed defect triage and release support to ensure production stability across SuiteApps.

Ernst & Young Global Delivery Services

February 2023 - June 2025

AI-Enabled Automation Engineer

- Delivered RPA solutions via UiPath and Power Automate; earned vendor certifications.
- Built full-stack tools including a GraphQL data extractor and GDPR-compliant bot.
- Prototyped AI chatbots and data pipelines using Kore.AI, Databricks, and PowerBI.

GMA New Media Inc.

November 2021 - January 2023

Associate Developer

- Built and integrated backend/frontend modules with third-party logins and payment systems.
- Customized Odoo framework features to meet client and management requirements.
- Coordinated with managers, designers, and testers to refine workflows and maintain codebases.

Institute of Computer Science, UPLB

June 2019 - July 2019

Software Developer Intern

- Migrated Mt. Makiling's biodiversity database to NodeJS, React, and MySQL for improved performance and UI.
- Added backend features such as Google login integration to enhance accessibility and security.
- Collaborated with science students and developers to ensure data integrity, contributing to a published paper.
